Notes

* AQI is not calculated for today's bulletin for Chandrapur, Gurgaon, Haldia, Panchkula, Rohtak, Varanasi, Agra, Faridabad, Lucknow as data was not available.

* In case of a city with multiple monitoring locations, average value is used to indicate air quality. Air quality may show variations across locations, and averaging is not a scientifically sound approach. However, for the sake of simplicity this method is being followed. For AQI of monitoring locations, website (<http://cpcb.nic.in>) may be referred.
