

## **Air Quality Index on July 29, 2015 @ 4:00 P.M.**

*(Average of past 24 hours)*

| City        | Air Quality  | Index Value | Prominent Pollutant    | Based on number of monitoring stations |
|-------------|--------------|-------------|------------------------|--|
| Agra        | Good         | 28          | CO                     | 1                                      |
| Ahmadabad   | Good         | 37          | PM <sub>2.5</sub>      | 1                                      |
| Bengaluru   | Good         | 49          | CO                     | 3                                      |
| Chennai     | Satisfactory | 96          | PM <sub>2.5</sub>      | 3                                      |
| Delhi       | Satisfactory | 73          | PM <sub>10</sub>       | 6                                      |
| Faridabad   | Satisfactory | 25          | CO                     | 1                                      |
| Hyderabad   | Good         | 49          | PM <sub>2.5</sub>      | 1                                      |
| Kanpur      | Satisfactory | 64          | CO                     | 1                                      |
| Lucknow     | Moderate     | 116         | PM <sub>2.5</sub> , CO | 3 (One station @ 3.00 PM)              |
| Navi Mumbai | Satisfactory | 85          | CO                     | 1                                      |
| Varanasi    | Satisfactory | 99          | PM <sub>10</sub>       | 1(@ 3.00 PM)                           |

\* In case of a city with multiple monitoring locations, average value is used to indicate air quality. Air quality may show variations across locations, and averaging is not a scientifically sound approach. However, for the sake of simplicity this method is being followed. For AQI of monitoring locations, website (<http://cpcb.nic.in>) may be referred.
