

## Air Quality Index on June 02, 2015 @ 4:00 P.M.

(Average of past 24 hours)

| City        | Air Quality  | Index Value | Prominent<br>Pollutant             | Based on number of monitoring stations |
|-------------|--------------|-------------|------------------------------------|--|
| Agra        | Satisfactory | 66          | O <sub>3</sub>                     | 1                                      |
| Ahmedabad   | Satisfactory | 80          | PM <sub>2.5</sub>                  | 1                                      |
| Bengaluru   | Satisfactory | 56          | O <sub>3</sub> , PM <sub>2.5</sub> | 2                                      |
| Chennai     | Poor         | 228         | PM <sub>2.5</sub>                  | 2                                      |
| Delhi       | Poor         | 253         | O <sub>3,</sub> PM <sub>10</sub>   | 5                                      |
| Faridabad   | Satisfactory | 80          | PM <sub>2.5</sub>                  | 1                                      |
| Lucknow     | Moderate     | 109         | СО                                 | 3                                      |
| Navi Mumbai | Moderate     | 108         | СО                                 | 1                                      |

- \* AQI is not calculated for today's bulletin for Varanasi and Kanpur, as updated data was not available due to internet problem and for Hyderabad due to breakdown of  $PM_{2.5}$  analyser.
- \* In case of a city with multiple monitoring locations, average value is used to indicate air quality. Air quality may show variations across locations, and averaging is not a scientifically sound approach. However, for the sake of simplicity this method is being followed. For AQI of monitoring locations, website (http://cpcb.nic.in) may be referred.
