\+ AQI calculated based on data available till 3 PM at 3 stations.

* AQI is not calculated for today's bulletin for Varanasi because of insufficient data due to Data Acquisition System failure at station.

* In case of a city with multiple monitoring locations, average value is used to indicate air quality. Air quality may show variations across locations, and averaging is not a scientifically sound approach. However, for the sake of simplicity this method is being followed. For AQI of monitoring locations, website (http://cpcb.nic.in) may be referred.
